# Contents

Preface vii

## I Euclidean Topology

1 Introduction to Topology 3
   1.1 Deformations 9
   1.2 Topological Spaces 18

2 Metric Topology in Euclidean Space 28
   2.1 Distance 28
   2.2 Continuity and Homeomorphism 43
   2.3 Compactness and Limits 52
   2.4 Connectedness 62
   2.5 Metric Spaces in General 72

3 Vector Fields in the Plane 87
   3.1 Trajectories and Phase Portraits 87
   3.2 Index of a Critical Point 96
   3.3 *Nullclines and Trapping Regions 106

## II Abstract Topology with Applications

4 Abstract Point-Set Topology 119
   4.1 The Definition of a Topology 119
   4.2 Continuity and Limits 130
   4.3 Subspace Topology and Quotient Topology 138
   4.4 Compactness and Connectedness 150
   4.5 Product and Function Spaces 157
   4.6 *The Infinitude of the Primes 164

5 Surfaces 167
   5.1 Surfaces and Surfaces-with-Boundary 168
   5.2 Plane Models and Words 178
